New developments in the automotive industry are made quickly; the brand-new developments of today being the basic equipment of tomorrow. The car of the future is subject to rising demands: it is to be greener, safer, and more comfortable. For many new developments and their on-board operation, one component plays a key role: the speciality lubricant.

As a manufacturer of vehicles and components, you trust the lubricant to reliably fulfil your and your customers' requirements during the lifetime of the car. Invisible for the passengers, the lubricant makes a major contribution to your success; high-quality speciality lubricants can help you reduce the risk of product failure and recalls.

Klüber Lubrication knows exactly what the special requirements of the automotive industry are. We are in constant dialogue with car manufacturers and their suppliers. Our experts are always at your side as consultants and development partners, whether you are adapting, redesigning or newly developing either parts, components or complete systems.

We offer personal solutions designed to meet your needs and requirements: some of them are products that have been successfully used in the field for many years; others are especially developed lubricants tested thoroughly on rigs adjusted for your specific requirements.

Yet, merely to offer suitable products is not sufficient to meet the total scope of your needs. We strive to be your preferred supplier of speciality lubricants. We are wherever you need us - our specialists are at your side worldwide. Safe, quick, flexible and reliable solutions is what Klüber Lubrication stands for.

Klüber Lubrication: More than speciality lubricants

The Klüber Lubrication Performance Spectrum

Speciality lubricants and added value for our customers

Field-tested quality

Our products have proven their value in the automotive industry for decades, well confirmed by our customers with a multitude of approvals and specifications.

The right product for every requirement

The approx. 250 friction points in a car all have very different tribological requirements. Klüber Lubrication offers you the right lubricant for each. Should we not have it on our shelves yet, we will develop it together with you. Our technical advisers are happy to support you in finding the best product for your ideas.

Development partner and consultant

We participate in many working groups and committees, e.g. the German Automotive Industry Association (VDA), the German Society for Tribology, the European Lubricating Grease Institute (ELGI), the REACH Implementation Project and the German Association of the Chemical Industry. Klüber Lubrication takes part in decision-making and development processes affecting lubricants for the automotive industry at an early stage, ensuring that you have a lubrication partner that understands the demands being placed upon the lubricants you need.

Our certifications include ISO TS 16949, ISO 9001, ISO 14001 and EMAS, and testify to the quality of our products.

A test bay that is unrivalled worldwide

We develop and test our automotive speciality lubricants based on the specific requirements of your industry. Our unique test bay offers more than 100 test rigs, some of which we developed ourselves for particular testing purposes.

In our development activities, we attach great importance to close cooperation with automobile manufacturers and suppliers. We adjust the test rigs to your requirements where needed. After all, we know how important it is that the lubricant meets, or even exceeds, your requirements already during testing.

Global presence

We are where you are. Our specialists are there to support you, wherever you need them. We help you select the right product or develop a solution tailored to your requirements.

“Made by Klüber Lubrication” stands for a consistent high quality level worldwide. We offer you products that are all made to the same high quality, no matter whether produced in Asia, Europe or the Americas.

Your partner for speciality lubricants in the automotive industry

We consider ourselves your partner in all tribological questions. We offer more than excellent products and high competence:

- Quick and flexible handling of your enquiry
- Competent technical and commercial consulting
- Reliable information
- Added value: more than just a product
- Local presence: we are where you are

Test us!

Body & Exterior

Lubricants for car bodies and exterior areas must be highly effective within specified temperature ranges and withstand salt, water and dust for many years. Our lubricants ensure smooth operation of sun roofs, window mechanisms, etc. for their entire lifetime.

Our customers

Audi, BMW, Bosch, Brose, Daimler, Edscha, Ford, General Motors, Grupo Antolin, Huf, Hyundai/Kia, Igarashi, IMS Gear, Inalfa, Inteva, Johnson Electric, Kiekert, Lames, Magna, MGI Coutier, Mitsuba, Nuova SME, PHA, Valeo, Volkswagen, Webasto, Witte/Strattec

Product approvals

Chrysler MS 9958, Daimler DBL 6827.40, Ford WSD-M1C234-A2, Ford WSD-M1C238-A, Ford WSD-M1C244-A, FordESF-M1C43-A2, FordWSB-M1C160-D2, FordWSD-M1C234-A, HKMC MS511-39, Opel B 0400571, Opel B 0400852, Opel B 0400858, Opel B 0401122, Opel B 0401138, Porsche 999.917.544.00, Porsche 999.917.790.00, PSA B 71 3841, Toyota TSK2522G, VW-TL 52141, VW-TL 52147, VW-TL 52150, VW-TL 751, VW-TL 767 X, VW-TL 778 A, VW-TL 778 B

Interior

Noise damping and top-quality haptics are in focus when it comes to the interior, where regulators and knobs must move smoothly. Our range of speciality lubricants for interior requirements is carefully tuned to provide just those dynamics you are looking for. They are free of health hazards and provide neutral odour as well as low fogging tendencies.

Glove compartment lock mechanism
POLYLUB GLY 801
Compatible with many materials;
for good haptics

HVAC flaps
Klüberbeta RM 47-102
Very low fogging tendency

Central armrest
OPTAPLUS AO 35
Prevention of squeaks, rattles
and other NVH problems

Lumbar support and crash-active headrest
Klübersynth LF 44-22
Low friction values for ease of use and
comfort

Variable seat belt retractor
Klübersynth LR 44-21
Lifetime operation of gear
motor actuators

Backrest adjuster
Klübersynth RA 44-702
Damping effect without
juddering and slipping

Pedal box
POLYLUB GLY 151
Smooth operation and noise
prevention

Chassis

Besides the brakes, steering systems have the highest lubrication requirements in the chassis. We developed lubricants together with well-known steering system manufacturers that ensure a safe driving sensation through low breakaway torque and excellent friction values.

Our customers

Powertrain

Lubricants used in vicinity of engine and transmission, as well as lubricants for driveshafts are subject to a wide variety of requirements. Near the engine, temperatures can reach more than 200 °C, while aggressive degradation products accumulate in intake and exhaust systems. We help you overcome these challenges, for example with high-temperature and blow-by resistant speciality lubricants.

Variable intake manifolds.
Klüber Noxlub KF 1920
Reliable lubrication even within blow-by

Gear shift selector
Klübersynth LIP 84-42
Good haptics even at very low temperatures

Electronic waste gate
Klübersynth BR 46-82
Resistant to waste heat

Spline shafts
MICROLUBE GNY 202
Minimises tribocorrosion

Constant velocity joints
Klüberlub HE 71-281
Long service life even at high torques

Water pump bearing
PETAMO GHY 133 N
Tried and tested for decades

Start-stop starter
Klübersynth EL 42-32
Low wear during constant operation

Our customers

Audi, BMW, Bosch, Continental, Daimler, Delphi, Denso, DURA, ECS, Ford, FTE automotive, GAT, General Motors, GETRAG, GKN, GMB, Himmermann, Hyundai/KIA, Litens, Magneti Marelli, Mahle, Mazda, Mubea, NSK, NTN, PHA, PSA Peugeot Citroën, Scania, Schaeffler, SEAT, Teleflex, Toyota, TRW, Valeo, Voith, Volkswagen, Volvo, ZF

Product approvals

Bosch FS 18570-Ft, Bosch VS 10832-Ft, Bosch VS 18099-Ft, Brembo D1.04.18.000, Chrysler MS 9958, Daimler DBL 6817.00, Daimler DBL 6827.31, Daimler DBL 6834.00, Ford ESA-M1C194-A, Ford ESD-M1C220-A, Ford ESF-M1C 43-A2, Ford WSD-M138P8A1, Ford WSD-M1C244-A, Opel B 0400043, Opel B 0400571, Opel B 0400882, Opel B 0401122, Opel B 0401138, Porsche 999.917.791.00, PSA B 71 3841, PSA X 10 1, PSA X 71 3100, PSA X 71 3102, PSA X 71 3134, Toyota TSK2520G, Toyota TSK2524G, VW-TL 52112, VW-TL 52141, VW-TL 52142, VW-TL 52147, VW-TL 52150, VW-TL 52172, VW-TL 52528, VW-TL 751, VW-TL 760, VW-TL 767 X, VW-TL 776, VW-TL 778, ZF LMN 304

Please note that the a.m. information is only a small extract from our range of products and applications with no claim of completeness

Powertrain	Component requirements	lifetime lubrication	compatibility with polymers	resistance to water	resistance to fuel / blow-by condensates	dust & dirt capacity	no fretting / no tribocorrosion	wear protection & load carrying capacities	corrosion protection		wide temperature range	low friction & high efficiency	low break away & running torques	anti squeak & anti stick-slip	no hootnoise	Products

Our products and their main characteristics

ALTEMP Q NB 50	lubricating paste with good wear protection
ASONIC HQ 72-102	high-temperature lubricating grease for low-noise rolling bearings
BARRIERTA KL 092 / KM 192	chemically inert PFPE products with excellent low temperature performance
BARRIERTA L 55/2 / L 55/0	chemically inert PFPE products with excellent media resistance
CENTOPLEX 24 DL / 1 DL	multi purpose low temperature grease
CENTOPLEX CX 3/350	shear stable lithium complex mineral oil grease, NLGI 0/1
CONSTANT GLY 2100	synthetic impregnating fluid for low-noise lubrication
CONSTANT OY K Series	synthetic hydrocarbon oils incorporating special additives for wide temp range
DUOTEMPI PMY 45	light-coloured high-pressure lubricating paste for frictionally engaged connections
ISOFLEX LDS 18 Special A / A/UV	dynamically light, long-term lubricating grease; version with UV Indicator available
ISOFLEX M 2 JB	special grease additivated against accelerated ageing in contact with non-ferrous metal
ISOFLEX TOPAS L 32 / L 32 N	the proven and tested synthetic low temperature grease in automotive industry
ISOFLEX TOPAS NB 5051	low temperature grease with excellent polymer compatibility (PA 66)
ISOFLEX TOPAS NB 52	synthetic grease with good high temperature performance, media resistance and compatibility with PA 66
ISOFLEX TOPAS NCA 52	synthetic long-term grease with low starting and running torques
Klüber Noxlub BF 2420	chemically inert PFPE product with excellent media resistance
Klüber Noxlub KF 1920	chemically inert PFPE products with excellent low temperature performance
Klüber Summit HySyn FG 68	synthetic hydrocarbon oil with good oxidation stability
Klüberalfa DH 3-230 N	PFPE product with very good media resistance and very good wetting properties
Klüberalfa DH 3-350	high-temperature lubricating oil with very good media resistance
Klüberalfa HM 83-801	high-temperature long-term and lifetime lubricating grease
Klüberalfa HX 83-301 / -302	long-term lubricating greases for seals, guides and rolling bearings subject to high loads
Klüberalfa IR 83-22	chemically inert PFPE product with excellent media resistance
Klüberalfa K 83-735	special dispersion for lubrication of plug-in contacts
Klüberalfa MR 3 Series	universal anti-friction fluids for seals, guides and plastic friction points in motor vehicles
Klüberalfa YM 3-30	PFPE oil with excellent polymer compatibility
Klüberbeta RM 47-102	lithium complex silicone grease with extremely low fogging tendency
Klüberbeta RM 47-291	anti-friction lubricant for pneumatic valve seals
Klüberflex 200-0 A/B	2-part coating for wiper blades with modular additive system to streamline performance
Klüberfluid 9 R 100	EPDM compatible assembly and anti-corrosion fluid with excellent wetting properties
Klübergrease LFT 71-402	water resistant polyurea grease with excellent corrosion protection
Klüberlectric KR 44-22 / -102 / -402	special greases for lubrication of electrical switches, contacts and sensors
Klüberlub EH 71-241	drive shaft joint grease - high temperature
Klüberlub EM 41-111	drive shaft joint grease - normal temperature
Klüberlub EM 41-142	high performance grease with excellent anti wear properties
Klüberlub HE 71-281	drive shaft joint grease - high efficiency, high temperature

Klüberlub LM 41-102	high performance grease with self locking properties
Klüberlub LM 41-32 N	low temperature grease with self locking properties
Klüberoil 4 UH 1-32 N	NSF H1 registered synthetic hydrocarbon oil
Klüberoil 4 UH 1-150 N/...-450 N	synthetic hydrocarbon oils with food grade certification
Klüberpaste 46 MR 401	EPDM compatible high temperature paste - medium base oil viscosity
Klüberpaste HEL 46-450	high temperature bolt and screw paste
Klüberpaste UH1 84-201	NSF H1 registered adhesive paste for long-term lubrication
Klüberplex BEM 34-132 /-131N	synthetic hub unit bearing greases with excellent false brinelling protection
Klüberplex BEM 41-132	mineral oil general purpose hub unit grease
Klüberplex BEM 41-141	u-joint grease for high temperature
Klüberplus S 02-004	water-miscible anti-friction dispersion for windscreen wipers
Klüberplus S 06-100	water soluble assembly aid - based on silica gel
Klübersynth BEP 72-82	rolling bearing grease for long-term lubrication
Klübersynth BLR 46-122	non-silicone grease for brake booster seal and valve lubrication
Klübersynth BM 44-42	special grease for freewheels, linear guides and four point bearings
Klübersynth BME 44-42	special grease for ball screws with very high load
Klübersynth BR 46-32 F	low-friction grease without silicone-based raw materials with very wide service temperature range
Klübersynth BR 46-82	lithium complex grease without silicone-based raw materials with very wide service temperature range and excellent wear resistance
Klübersynth EL 42-32	start-stop starter grease with excellent life time performance
Klübersynth GE 14-111	synthetic gear grease with excellent load carrying capacities
Klübersynth H 46-702	DMF grease with very low oil separation
Klübersynth HB 72-102	synthetic rolling bearing grease with exceptional corrosion protection
Klübersynth HB 72-52	EPDM compatible bearing grease with a wide service temperature range
Klübersynth HB 74-401	synthetic polyurea grease for high loads and good wear protection
Klübersynth HIP 84-401	high-temperature grease with excellent damping properties for friction pairings subject to high loads
Klübersynth HLR 46-371	universal polyglycol grease for hydraulic brake and clutch systems
Klübersynth J 44-402	synthetic ball joint lubricant with low break away torque
Klübersynth JIP 84-402	synthetic anti stick-slip grease
Klübersynth LE 14-161	synthetic high efficiency gear grease - based on aluminium complex soap
Klübersynth LE 44-31	synthetic high efficiency gear grease - based on lithium soap
Klübersynth LF 44-22	synthetic low temperature & low friction lubricant
Klübersynth LI 44-22	synthetic low temperature grease with good damping properties
Klübersynth LIP 84-42	synthetic low temperature & low friction lubricant with good haptic damping properties

Our products and their main characteristics

Klübersynth LP 42-32	starter grease with excellent life time performance in plastic gears
Klübersynth LR 44-21	low temperature grease with good noise dampening
Klübersynth MR 96-31	low temperature grease with excellent polymer compatibility (PP, HDPE, etc.)
Klübersynth P 84-52 G	synthetic low temp PTFE paste with excellent dust & dirt capacity
Klübersynth RA 44-3502	good compatibility with plastics; for noise reduction and high mechanical damping of low-speed components
Klübersynth RA 44-702	good compatibility with plastics; for noise reduction and medium mechanical damping of low-speed components
Klübersynth RM 14-211	anti friction lubricant for shock absorber seals
Klübertemp GR M07	chemically inert PFPE product with excellent viscosity index - extreme low temp performance
Klübertemp GR M30	chemically inert PFPE product with excellent viscosity index - low temp performance
Klübertemp RHB 83-202	chemically inert PFPE product with good media resistance and EPDM compatibility
Klübertop TM 06-111	1-part coating with very good corrosion protection
Klübertop TP 03-111	1-part heat curing bonded coating
Klübertop TP 18-810 N	1-part coating specially made for flocked profiles
Klübertop TP 22-1310 A/B	water-miscible 2-part coating for automotive body seals
Klübertop TP 39-311 A/B	2-part PTFE bonded coating for metal components
KONTASYNTH BA 100 SPRAY	gliding spray for contacts, seals, guides and plastic friction points
MICROLUBE GL 261	special grease for boundary friction conditions and tribo-corrosion
MICROLUBE GNY 202	special grease for boundary friction conditions and tribo-corrosion
MIKROZELLA Series	unique depot lubricants for lifetime enhancement of sintered bearings
NONTROP GB 3 G	dust cap assembly grease for drum brake slave cylinders with good high temperature performance
OPTAPLUS AO 35	high performance damping grease
PETAMO GHY 133 N	water pump bearing grease
PETAMO GY 193	roller bearing grease for the high-temperature and long-term lubrication
POLYLUB GA 352 P	standard lubricant for shock absorber seals
POLYLUB GLY 151	semisynthetic lithium complex grease with excellent plastic compatibility and good adhesion - low viscosity
POLYLUB GLY 501	semisynthetic lithium complex grease with excellent plastic compatibility and good adhesion - medium viscosity
POLYLUB GLY 801	semisynthetic lithium complex grease with excellent plastic compatibility and good adhesion - high viscosity
QUIETSCH-EX	universal anti-squeak fluid
STABUTHERM GH 461	polyurea grease for high loads and good water resistance
SYNTHESO GLEP 1	EPDM compatible grease for brake components and hydraulic seals
SYNTHESO GLK 1	EPDM compatible grease for brake components and hydraulic seals

SYNTHESO GLK 1 PF	EPDM compatible grease for brake components and hydraulic seals - PTFE fortified
UNIMOLY C 220	High-pressure resistant hygrosetting bonded coating
UNISILKON GLK 112	lithium complex silicone grease with multiple OEM approvals
UNISILKON GLK 1301	DMF grease based on silicone oil
WOLFRAKOTE TOP PASTE	high temperature anti-seizing paste

The data in this document is based on our general experience and knowledge at the time of publication and is intended to give information of possible applications to a reader with technical experience. It constitutes neither an assurance of product properties nor does it release the user from the obligation of performing preliminary field tests with the product selected for a specific application. All data are guide values which depend on the lubricant's composition, the intended use and the application method. The technical values of lubricants change depending on the mechanical, dynamical, chemical and thermal loads, time and pressure. These changes may affect the function of a component. We recommend contacting us to discuss your specific application. If possible we will be pleased to provide a sample for testing on request. Products from Klüber Lubrication are continually improved. Therefore, Klüber Lubrication reserves the right to change all the technical data in this document at any time without notice.

Klüber Lubrication – your global specialist

Innovative tribological solutions are our passion. Through personal contact and consultation, we help our customers to be successful worldwide, in all industries and markets. With our ambitious technical concepts and experienced, competent staff we have been fulfilling increasingly demanding requirements by manufacturing efficient high-performance lubricants for more than 80 years.
