Clear standard EVOH bag with oxygen barrier.

aran winebag

The B.I.B packages for wine are showing an increasing demand on the world market. These are bags designed for wine from the bag-in-box product range, used extensively by leading wineries and winemakers the world over.

Aran specializes in the development and manufacture of bags designed mainly for table wines, home wines, and premium wines for the home and institutional market. This is an ideal package for restaurants, hotels and catering services because of the convenience, carriage and storage and as a package that preserves the quality of the wine allowing long term simple and easy usage. The winebag products by Aran are offered in various bag volumes and are equipped with a wide range of convenient and efficient pouring systems. These systems prevent the penetration of air into the package, which is unavoidable when pouring from bottles.

Why aran?

- > The world's most advanced films for the packaging of liquid food products.
- > A wide range of quality, flexible and durable packages with a variety of combined features.
- > Solutions customized to the packaged product, storage conditions, transport and unique customer requirements.

Taps and pouring systems

The winebag products are available with five types of accessories:

- > Press-tap and Vitop: taps that open with pressure and close automatically, for fast and safe pouring.
- > Twist-tap: a tap for especially comfortable pouring.
- > QCD for quick connect and disconnect: a pouring system that includes a pump and pouring head to ensure maximum cleanliness, sealing and high convenience of use.
- > 8mm tap: for large volume pouring, reusable and transferable between packages.

The filling process

Filling of the bags is done by designated machines adapted to filling wine. In the semi-automatic machine the bags are fed manually, while in the automatic machine the bags are attached (perforated) and automatically fed by the machine at a very high speed, with separation done after completion of the process. In most types of machines the filling process is accompanied by creating a vacuum in the bag prior to filling, and by injecting nitrogen following filling and prior to closing the tap - in order to allow the product long shelf life.

Volumes

- > 2 liter / 3 liter / 5 liter for the home market
- > 10 liter / 15 liter / 20 liter for the food service market
- > 200 liter / 1,000 liter for storage and transport

Why winebag?

- > **Availability:** You can pour out a glass of wine at any time without the commitment entailed in opening a bottle.
- > **Quality:** The package maintains the quality of the wine in the long term irrespective of frequency of use
- > **Saving:** the home market 2-5 liter package is especially economical for wine consumers. The 10-20 liter packages constitute an efficient and economical solution for the food service market.
- > **Marketing:** A solution that increases home wine consumption because of the convenient and prolonged use.
- > **Flexible design:** the box can be designed, printed and used as an advertising surface in various ways.
- > **Convenience:** light package easy to carry, use and store.
- > **Transport:** the package form enables the containment of many units of a given volume, easy storage and reduction in transport costs.
- > **Environment:** less pollution as a result of 70% saving on raw materials compared to rigid containers of the same volume.

- > A wide selection of supplementary accessories - taps, spouts, etc., to provide the best complete solution.
- > Uncompromised product quality thanks to an excellent quality control system. ISO 9002 authorization and upholding of FDA regulations and European standards.

- > An excellent customer service, high availability and personal contact. Speedy delivery including small quantities.
- > Technical support for the customer and continuous professional follow up.

aran's technical department will be happy to customize a unique product in answer to your demand, in the required dimensions and adapted precisely to your requirements.
