PERMAGSA

YOUR TRACTION LIFT SOLUTIONS

The company was founded in **1965**, we have more than 50 years experience in the development of permanent magnet synchronous motors for the industry, such as power plants, servo motors, cranes, etc.

Due to the serious work and high quality, the company has had steady growth of **20%** annually.

Nowadays, **PERMAGSA** is one of the biggest motor manufacturers of Europe, developing synchronous PM motors as motors for the lift industry, servo motors, electric vehicle motors or tailor made motors. We count among our customers the largest elevator installers in Germany.

OUR BUSINESS TODAY

Elevator motors
Industrial applications
Electric vehicle
Custom design

200.000 **GEARLESS**
installed all over the World

Production and Development

We have a professional team in constant training and evolution working with the most advanced technical equipment for the development of the latest technology, it make us capable of developing customized tailor made solutions.

30.000m²

1.200 Employees

80% Graduated in higher grades

60% Engineers of various branches such as electricity, electronics, mechanics, telecommunications...

2 Test Towers

1 Real Lift for test and developing

3 Test Benches

WORLD WIDE NET

PERMAGSA has been growing steadily year after year. With our elevator motor production and worldwide distribution we are suppliers of major brands and we are present in all over the world.

ELEVATOR MOTOR

<45dB

Our innovative design has established the company internationally as one of leading manufacturer of elevator motors. It provides the highest levels of performance and energy efficiency plus enhanced response to satisfy today's needs and trends in the elevator market.

Flexibility and adaptability

One of our most important advantages is the flexibility and adaptability of our engines and services to the needs of each project and client.

PERMAGSA's gearless motor has low electricity consumption and a long life span.

We design and manufacture the most **SILENT (<45 dB)** compact, lightweight and energy saving elevator motor for the lift industry. We develop durable, reliable and tested permanent magnet synchronous motors, 100% adapted to our customers requirements.

7 YEARS WARRANTY

OPTIMUS

Optimus is a motor design that provides the best balance in specifications and cost optimization. Advanced motor technology, reduced size developed specifically for reduced dimensions shaft.

It also has a simple placement system, which facilitates maintenance work.

Brake voltage (Vdc)	210	210

BELT MACHINE

Belt Machine will bring a revolution to the traditional lift. With its breakthrough in the design, it can be used for a wide range of applications.

In turn, the belt machine is a new kind of motor that's revolutionizing the elevator motors.

INNOVATIVE DESIGN
HIGHER PERFORMANCE
HIGHER EFFICIENCY

320 PULLEY

320 Pulley is a standard product off elevator motors. It has been a bestseller in the past years. It can be used for a variety of purposes.

It is a standard product off elevator motors with a long track record of providing high quality products and services. Ideal to replace old motors of any other brand, the perfect universal product.

HIGH LOAD

High Torque motors.

Those elevator motors have a high strength-to-weight ratio, which makes it suitable for heavy-duty, high-capacity elevators.

Powerful engines with high spec versatility.
Maintenance saving
