INDUSTRIA AERONÁUTICA

The aim of the magazine **Technique and Technology for the Aeronautical Industry** is to encourage, promote and stimulate the aeronautics sector.

The magazine covers the most interesting topics in relation with the manufacture of aircraft from different points of view: most common materials and other emerging ones, tools for the machining, machines for the manufacture of metal parts and / or composites, automation process in this sector, new systems to improve production competitiveness, etc.

In conclusion, a magazine exclusively targeted at all those involved in the manufacture of aircraft, facilities or services for air transport.
