

Mink standard strip brushes – for sealing, guiding and carrying. Now for tight spaces!

Mink Spazzole a listello standard- Per la tenuta, la guida e il trasporto.
Ora anche per spazi ristretti!

Cepillos de listón estándar de Mink – para hermetizar, guiar y soportar.
¡Ahora tambien disponibles para espacios reducidos de montaje!

Think Mink!®

Mink strip brushes – reliable sealing and guiding

Spazzole a listello- guida e tenuta affidabili

Cepillos de listón de Mink - hermetizar y guiar

A broad range of applications – simple and economical

They can seal cable passages, close gaps, protect against draughts, wipe chaff and chips from conveyor belts, guide bottles, prevent reverse movement on conveyer belts, and gently convey objects like metal panels, window frames and doors. With Mink strip brushes, the possibilities are endless. In addition to a wide variety of bristles we have a large selection of special profiles and an impressive range of standard products. Whatever your needs, we can supply the right bristle configuration.

Una vasta gamma di applicazioni-soluzioni semplici ed economiche

La moltitudine e la flessibilità delle fibre delle spazzole a listello Mink offrono innumerevoli possibilità di combinazioni per ottenere la sigillatura dei passaggi dei cavi, chiudere fessure, proteggere dalle correnti d'aria, pulire i nastri trasportatori da trucioli, fare da guida alle bottiglie, impedire le inversioni di movimento sui nastri trasportatori e trasportare con cura oggetti come pannelli metallici, telai di finestre e porte. Oltre ad una vasta gamma di setole abbiamo un'ampia selezione di profili speciali e una vasta gamma di prodotti standard. Qualunque sia la vostra esigenza, noi siamo in grado di offrirvi la giusta soluzione.

Un grán numero de aplicaciones – sín complicaciones y económicas

La multitud de posibilidades y la flexibilidad de las fibras de los cepillos de listón de la casa Mink facilitan innumerables posibilidades de combinación. Se suelen utilizar en el cerramiento flexible de pasos de cables, en ranuras o sellar corrientes de aire, en la limpieza de raspaduras y virutas en cintas transportadoras, en el guiado exacto de botellas, como elemento de frenado con las fibras inclinadas en contra del sentido de avance o como elemento suave de transporte y soporte para chapas metálicas, marcos de ventanas o puertas. A parte de la gran variedad de perfiles especiales y el impresionante surtido en artículos de la gama estándar somos capaces de mezonar cualquier perfil que sea apto con nuestra tecnología de fabricación.

Your advantages:

I vostri vantaggi:

Sus ventajas:

- Perfect sealing of doors, gates, apertures, passages and gaps
- Protection against lubricating emulsions and flying chips
- Scratching and marking is reliably prevented
- Point-like bristle surface reduces friction
- Large selection of standard and special profiles
- Many possible combinations of materials for dealing with persistent contamination, high temperatures and running surfaces that are angled or stepped
- Thermal resistance from -50°C to +250°C for plastic bristles and up to +400°C for metallic bristles
- Bristle length from 5 to 500 mm

- Tenuta perfetta di porte,cancelli,fori,aperture e fessure
- Protezione contro la dispersione di emulsioni di lubrificanti e trucioli
- Protezione da graffi e ammaccature
- Ampia gamma di profili standard e speciali
- Basso coefficiente di attrito grazie al supporto affidabile
- Numerose combinazioni possibili di materiali per far fronte alle impurità, alle elevate temperature, a superfici di scorrimento angolate o con scalini
- Resistenza alle temperature da -50° e +250° per le fibre sintetiche, fino a +400° per le fibre metalliche
- Altezza delle setole: da 5 a mm y especial
- Gran variedad de posibles combinaciones de materiales: aptas para limpieza de suciedad persistente, altas temperaturas, para superficies de rodadura inclinadas o escalonadas
- Rango de temperaturas: -50°C hasta +250°C en fibras sintéticas, hasta +400°C en fibras metálicas
- Salida de fibras: desde 5 mm hasta 500 mm

Protection against flying chips
Protezione affidabile contro la dispersione dei trucioli
Protección fiable contra virutas volantes

Gentle transport of objects like windows
Cura nel trasporto di oggetti come per esempio le finestre
Soporte suave p. ej. en la fabricación de ventanas

Often inconspicuous, but always amazingly effective

Spesso poco visibile, ma sempre incredibilmente efficace

A veces invisibles pero increíblemente eficaces

Especially easy to install and use

Mink standard strip brushes are versatile not just because there are many varieties of bristles, but also because they can be installed in so many ways. They can be attached with screws, rivets or glue; they can slide on or push on. Installation is fast, with little need for tools.

More than 6,500 different standard articles are available. Strips can be ordered in lengths of one, two and three metres or can be cut to any required length.

Particolamente facile da montare e da usare

Le spazzole a listello Mink standard sono versatili non solo perché esistono molte varietà di setole, ma anche perché possono essere montate in tanti modi differenti. Possono essere fissate con viti, rivetti o colla, oppure possono essere semplicemente inserite. Il montaggio è veloce, e non necessita di grandi quantità di attrezzi. La gamma di articoli standard comprende più di 6500 articoli differenti. I listelli possono avere diverse lunghezze: uno, due o tre metri o possono essere tagliati senza problemi a misura, alla lunghezza richiesta.

Fácil e imbatibles en el montaje y en la utilización

La flexibilidad de los cepillos de listón estándar no se limita solamente en la fibra sino tambien en el montaje.

Los cepillos se pueden atornillar, remachar o pegar, insertar o clipsar. Los cepillos de listón de Mink se dejan montar fácilmente ahorrando tiempo y utilizando pocas herramientas. En la gama estándar disponemos de más de 6.500 distintos artículos en longitudes de un, dos y tres metros. Naturalmente podemos personalizar la longitud según su necesidad.

Compatible with various geometries Compatibile con differenti geometrie Compatible para distintas geometrias

Ideal for working apertures Ideali per aperture funzionali Idóneo para aperturas funcionales

For sealing gaps in doors and gates Per sigillare a vista porte e cancelli Cerramiento de ranuras en puertas y portones

For guiding PET bottles Come guida per le bottiglie in PET Guiado p.ej. de botellas PET

Mink Mini-STL – tiny profiles for tiny spaces

Mink Mini-STL- Piccolo profilo per piccoli spazi

Mini STL de Mink – perfiles Mini para pequeños huecos

Small brushes that do big jobs

For tight spaces we recommend the newest members of our family: Mink Mini-STL. This refined technology is ideal for sealing and guiding doors, gates, windows, roller shutters and insect screens. It is perfect for exhibition stands and shops. The bristles can be grouped with high density, allowing the brushes to be used not only for sealing, but for guiding and carrying as well. Possible applications include machine or automotive manufacture. The body of the Mink Mini-STL consists of an anodised aluminium profile. The plastic carrier (PE) slides into the profile.

Piccole spazzole, grandi vantaggi

In presenza di spazi ridotti, consigliamo i nuovi membri della nostra famiglia: I Mink Mini-STL. Questa tecnologia raffinata è ideale per la sigillatura e la guida di porte e cancelli, finestre, tapparelle e zanzariere. E' perfetto per stand fieristici e negozi. Grazie alla possibilità di poter ottenere una forte densità delle setole, le spazzole possono essere usate non solo per la sigillatura ma anche come guida e trasporto, per esempio nell'industria meccanica o automotiva. Il corpo dei Mini-STL è composto da un profilo in alluminio estruso anodizzato con inserita un'anima in plastica (PE).

Pequeños cepillos con grandes ventajas

Le recomendamos para el cerramiento de pequeños espacios nuestros nuevos cepillos Mini STL de Mink. Estos nuevos cepillos son aptos para el uso en cerramiento y en el guiado de puertas y portones, en la fabricación de ventanas y persianas, para mobiliario comercial, en mosquiteras o puertas correderas. La posibilidad de dotar los cepillos con una alta densidad de fibras facilitan un campo de aplicación de guiado y soporte de piezas p. ej. para la construcción de máquinaria y en el sector de la automoción. El material de la moldura de los nuevos cepillos de listón Mini STL de Mink se compone de aluminio natural anodizado. La moldura de aluminio lleva insertada un perfil de plástico (PE).

Designed for a variety of installation situations
