

AVEVA

Inspiring people
to shape a
sustainable future

Introducing AVEVA

AVEVA creates industrial software that inspires people to shape a sustainable future. We work with our customers and harness the power of our ecosystem to deliver solutions and expertise to optimize engineering, operations and performance. From water and energy to food and infrastructure, our solutions transform opportunity into business value. We use collaborative innovation to empower people and industries to thrive.

By the numbers:

- FTSE100 UK Company
- 50+ years of innovation
- 130+ patents
- 16,000 global customers
- 4,200 partners
- 5,000 talented people
- FY19–20: £833.8m revenue, 26% adjusted EBIT margin

We are proud of our proven track record in pioneering innovation in the engineering, operations and performance of industrial assets in diverse sectors, across the world. Our foundation over 50 years ago stemmed from a combined initiative of the UK Government and the University of Cambridge, with a mission to improve how technologies can empower industries to innovate and achieve greater benefits for the people and communities they serve.

Over the past fifty years, we have remained true to our founding principles, leading in research, pioneering new thinking, and working in partnership with leading companies to solve the world's most complex engineering, operations and performance challenges using state-of-the-art industrial software.

Deep customer relationships drive our innovations

Chemicals

650+ customer sites

Food, Beverage and CPG

2,600+ customers

Infrastructure

3,200+ customers

Marine

The world's **10** largest shipyards

Mining

50+ mining sites

Energy

550+ refineries

900,000 miles of pipeline

Power

1,000 power plants

500,000+ MW of electricity monitored

Manufacturing

4,650 manufacturing sites
and smart factories

Water and Wastewater

1,400+ water customers

What we do

We create industrial software that helps people to shape a sustainable future. Our R&D teams work closely with customers to address the complex and rapidly-evolving challenges industries face today, supporting the digital transformation of our world.

We have a proud track record of leading edge innovation, including IIoT, Cloud, industrial AI, Digital Twin, predictive and prescriptive analytics, big data and mixed, virtual and extended reality.

Our close relationships with our customers, established over many years, together with the scale of our 5,000 partner ecosystem, means we are at the forefront of sustainable innovation, helping to meet industrial teams' evolving needs, empowering their teams, and enabling our communities to thrive.

Engineering

We lay the digital foundation for project teams to simplify industrial asset design, take control of project execution, and raise operator competency. Our solutions give organizations the power to deliver capital projects to operations efficiently, on-time, and on-budget.

Operations

We enable organizations to make precise decisions – streamlining processes, optimizing production, reducing energy, and improving safety. Our solutions leverage data-driven visualization to eliminate value leaks, increase operational efficiency and maximize collaboration.

Performance

We connect people with enabling technology. Our solutions provide the cross-functional data and integrated analytics that teams need to balance operating expenses and risk, allowing them to optimize the supply chain, production and asset performance.

Our global customers

AVEVA's customers include some of the world's leading companies.

Helping people to shape the future

There are no limits to how technology can empower people to achieve more, realizing a sustainable future for industries. We continue to evolve our business in step with our customers, because our success is rooted in empowering people to seize the possibilities of a sustainable future, using world-beating industrial software.

Our success is rooted in our understanding of the day-to-day realities and challenges our customers face in diverse sectors. Working in collaboration, we create and pioneer solutions that power the world and drive a sustainable, successful future for the world's most complex businesses.
