SV-SELF CLOSE X110

Selfclose Compact Glass

+ info saheco.com

ES

SV-Selfclose es una nueva solución SAHECO para el cierre controlado y eficaz de puertas correderas de vidrio:

- Facilita el cierre de puertas correderas en espacios interiores a nuestro paso.
- Permite la posibilidad de mantener la puerta abierta gracias a su retenedor, dejando escoger de este modo, el momento de autocierre.
- Actúa de forma mecánica mediante cable extensivo de nylon (en bobina enrollable), que al engancharse a la puerta por el extremo, tira de ella hasta su completa oclusión.
- Garantiza un cierre sin ruidos, vibraciones ni golpes bruscos de la puerta con el contramarco, gracias al sistema de frenado **SOFTPRO** que amortigua en los últimos 10 cm de recorrido.
- Máxima capacidad de adaptación a cada tipo de puerta y entorno gracias a su engranaje extraíble que permite una potencia de desplazamiento de la hoja acorde a su peso, hasta un máximo de 110Kg.

SV-Selfclose X110 se ofrece en dos acabados: aluminio anodizado plata y aluminio inox cepillado de alta calidad. Además, el sistema ha sido probado en 100.000 ciclos según normativa europea EN1527 / EN1670 (En proceso).

EN

A new SAHECO solution for the controlled and effective closing of glass sliding doors:

- Aids the closing of sliding doors in interior areas when passing through.
- Fitted with a retaining device that offers the possibility of keeping the door open, thereby allowing the user to choose the moment for self-closing.
- Activated mechanically by means of an extendable nylon cable (on a windable reel), which hooks onto the end of the door and pulls it until it is completely closed.
- Its **SOFTPRO** braking system, with damping for the final 10 cm of the run, ensures that the door closes with no noise, vibrations or sharp knocks against the door-frame.
- Maximum capacity for adapting to every type of door and environment thanks to its extractable gearing which allows the panel to move with a power in accordance with its weight, with a maximum of 110 kg.

SV-Selfclose X110 is offered in two top track finishes; Satin Anodised Aluminium and a premium Brushed Stainless Steel Aluminium finish. In addition the system has been tested to 100,000 cycles in accordance with European performance standards EN1527 / EN1670 (In process).

FR

Nouvelle solution SAHECO pour la fermeture contrôlée et efficace de portes coulissantes en verre:

- Elle facilite la fermeture de portes coulissantes dans des espaces intérieurs sur notre passage.
 - Elle offre la possibilité de maintenir la porte ouverte grâce à son arrêtoir, permettant ainsi de choisir le moment de la fermeture automatique.
 - Elle agit de manière mécanique au moyen d'un câble extensible en nylon (en bobine enrollable), qui, étant fixé à la porte par son extrémité, tire celle-ci jusqu'à sa complète occlusion.
 - Elle garantit une fermeture sans bruits, sans vibrations ni coups brusques de la porte contre le contre-châssis, grâce au système de freinage **SOFTPRO** qui amortit la porte sur les derniers 10 cm de parcours.
 - Capacité maximale d'adaptation à chaque type de porte et d'environnement grâce à son engrenage extractible qui permet une puissance de déplacement du panneau conforme à son poids, avec un maximum de 110 kg.
- SV-Selfclose X110 est disponible en deux finitions: satinée en aluminium anodisé et notre aluminium inox brossé de haute. Le système a été testé à 100.000 cycles selon les normes européennes EN1527 / EN1670 (En procès).

SOFTPRO[®]

TECHNOLOGY by Saheco

**La nueva tecnología
de frenado suave
de Saheco SOFTPRO[®]**

**SOFTPRO[®] The new
soft-closing technology
from SAHECO**

**La nouvelle technologie
de système de freinage
de Saheco SOFTPRO[®]**

La nueva tecnología **SOFTPRO[®]** de frenado suave combina la función de dos pistones a gas y un amortiguador de aceite en un único componente.

Ofrece 4 funciones distintas:

- Velocidad de cierre ajustable
- El cierre es progresivo y se ralentiza cuando la puerta se acerca a la posición completamente cerrada
- Cierre suave
- Enganche resistente a la rotura

Garantiza un frenado seguro y evita el rebote de la puerta.

Proporciona un movimiento armónico y una amortiguación segura del cierre de la puerta hasta 110 kg.

SOFTPRO[®] The new soft-closing technology from SAHECO which combines two nitrogen gas filled pistons and one oil filled piston all within the same unit.

Features:

- Fully adjustable closing speed
- Closing action is PROGRESSIVE and slows down as the door approaches the fully closed position
- Soft Closing
- Anti break feature on the trigger

Ensures safe braking and Prevents bouncing of the door.

·Ensures the door is braked SAFELY
·Ensures the door is held firmly in the closed position
·Combines an aesthetically pleasing action with safe soft closing for door weights up to 110Kgs.

La nouvelle technologie de freinage **SOFTPRO[®]** fonctionne grâce à la combinaison de deux pistons à gaz et un amortisseur à huile.

Offre 4 types de fonctions:

- Ajustement flexible
- Frein progressive
- Freinage douce
- Crochet anti-rupture

Garanti un freinage fiable évitant le refoulement de la porte.

Apporte un mouvement esthétique et un amortissement fiable de fermeture de porte jusqu'à 110kg.

SOFTPRO[®]

TECHNOLOGY by Saheco

CARACTERÍSTICAS SOFTPRO[®]

Frenado progresivo de los últimos 65 mm de recorrido de la puerta, para hojas de hasta 110kg.

FEATURES SOFTPRO[®]

Progressive soft closing for the last 65mm of the doors travel into the fully closed position for door weights up to a maximum of 110Kgs.

CARACTÉRISTIQUES SOFTPRO[®]

Freinage progressif de derniers 65mm de parcours de la porte, pour panneaux jusqu'à 110kg.
