

CAMAC SMART

- El nuevo CAMAC SMART es el primer montacargas a cremallera creado específicamente para trabajar con un andamio tubular. Su diseño, compacto y ligero y sus reducidas dimensiones, permiten su fácil instalación en el andamio.
- Este nuevo montacargas está ideado para poderse manipular y montar manualmente, gracias a la ligereza del grupo base y la posibilidad de desmontar las cestas.
- Medidas exteriores para cesta pequeña (hueco 1500 x 700 mm.)
- The new CAMAC SMART is the first rack & pinion hoist created specifically to work with scaffolding systems. Its light and compact design, along with its reduced dimensions allow its easy installation inside the scaffold.
- This new rack & pinion hoist has been manufactured to be installed and moved by hand, thanks to the lightness of the base equipment and the possibility to dismantle the baskets.
- External sizes for small basket (hole of 1500 x 700 mm.)
