

# ZBP 40

AMIS Briquetting press

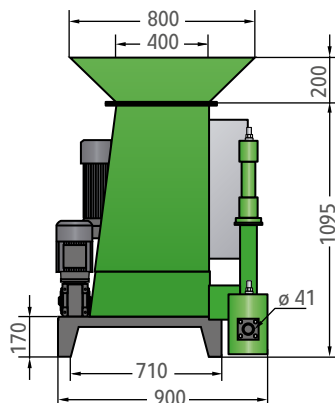

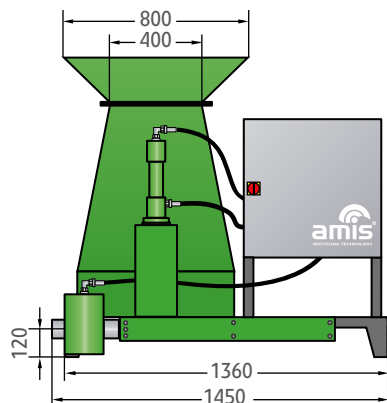

## The compact briquetting presses

The ZBP 40 briquetting press has been specially developed for small and medium-sized enterprises and convinces with a sensational price / performance ratio. The construction is compact and handy. With a width of less than one meter, the press fits through almost every door. The briquetting press is suitable for the briquetting of sawdust, wood dust, wood chips, paper and polystyrene.

# ZBP-40 Briquetting press

## Technical Data

Type ZBP		40
Briquette dimensions	(mm)	40
Hopper volume	(approx. cbm)	0,200
Voltage	(V)	380 – 420
Drive Power	(kW)	3,5
Throughput	(approx. kg)*	20 – 40
Weight	(approx. kg)**	420
Screw conveyor diameter	(mm)	150 x 150
Hydraulic pressure	(bar)	150
Oil tank	(l)	50

\* Throughput is dependent on the material and residual moisture content, which should not be more than 18%

\*\* Depending on equipment

### Options:

- Filling level indicators
- Automatic „On / Off“
- Low oil protection
- Connection of transport pipe

### Further features of the ZBP 40

- Optionally available funnel attachment for hand loading (can also be executed individually)
- Special design of the feed unit prevents bridging
- No agitator is required since the pressed material is guided to the discharge screw as a result of the special container geometry
- Energy saving

Briquet-Ø=40 mm Styrofoam / coarse wood / soft and hardwood
