

ZBP 60 L

AMIS Briquetting press

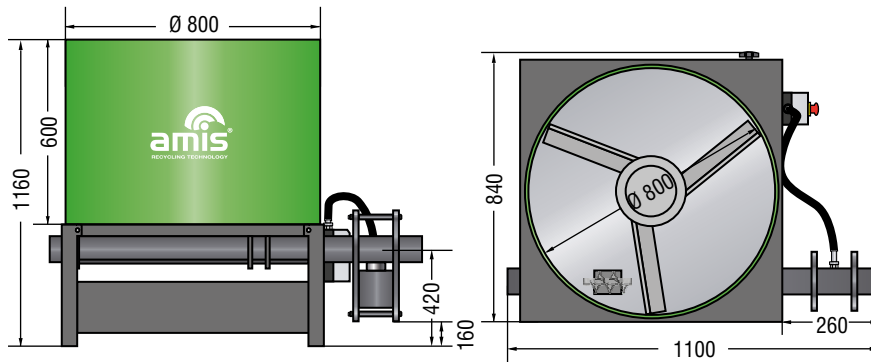

Immediately ready to use briquetting press

The briquette press is designed for pressing sawdust and all kinds of wood chips into briquettes. The design of the briquetting press is compact, handy and is produced in Germany. The large oil tank ensures that the oil can not overheat during continuous use of the press. The briquette press is immediately ready for use and does not have to be installed yet - so plug in and off you go.

ZBP-60 L Briquetting press

Technical Data

Type ZBP		60 L
Hydraulic power unit	(kW)	3
Consumption per hour	(approx. kWh)	1,8 - 2,0
Voltage	(V)	400
Frequency	(Hz)	50
Fuse current	(A)	16
Supply cable length	(m)	3
Throughput	(approx. kg/h)*	30 - 40
Weight	(approx. kg)**	300

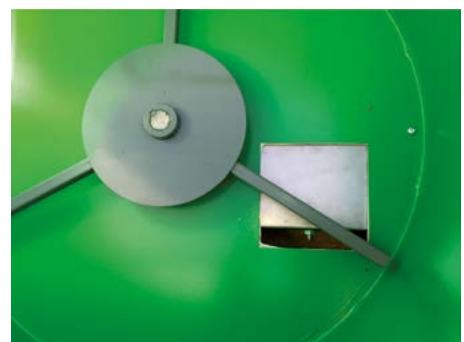

* Throughput is depending on the material and its residual moisture.
Residual moisture should not be more than 14%.

**Depending on equipment

Other Features:

- Hydraulic control
- Briquette diameter 60 mm
- Briquette length varies by the material to be pressed
- Motor equipped with motor protection switch and emergency stop
- No electronic components, such as controllers, sensors or complicated controls
- Pressing without addition of additives
- Counter pressure for your material is set automatically
- Thanks to the supercharger, voluminous chips can also be processed
- No adjustment or monitoring of the pressure is necessary
- Fully automatic operation
