LaserControl Micro Compact NT

BLUM
focus on productivity

LaserControl Micro Compact NT | Non-contact tool setting system for machine tools

Extremely precise support system for tool setting and monitoring under harshest conditions

- Tool setting and monitoring at nominal spindle speed
- Highest absolute accuracy due to focused laser beam
- 100 % process reliability due to patented NT-Electronics
- Blum pneumatic unit and shutter system provide superior protection
- Pre-aligned for easy mounting
- Programmable by integrated microprocessor

Your benefit:

- Increased productivity and production quality
- No subsequent damage due to tool breakage
- Reduced set-up time
- Unmanned operation
- Reduced scrap rate

Technical data

Laser safety classification	Class 2 acc. to IEC60825-1, 21 CFR 1040.10
Laser type	Visible red light laser 630 - 700 nm <1 mW
Protection class	IP68
Power supply	24V DC / 160 mA
Inputs/Outputs	24V DC 0 - 5 DC analogue output*
Repeatability	Δ transmitter / receiver <30 mm: 0,1 μ m 2 σ ** Δ transmitter / receiver <1.000 mm: 1,0 μ m 2 σ **
Minimum tool diameter	Δ transmitter / receiver <30 mm: 5 μ m ** Δ transmitter / receiver <1.000 mm: 125 μ m **
Test speed (spindle)	Up to 200.000 rpm
Storage/Operating temperature	-10 °C ... +70 °C +5 °C ... +45 °C

* Option

** Depending on installation situation, stability of fixation, distance and measuring mode

Support systems provide highest precision even with micro-tools

Fast detection of micro-wear at the cutting edge

Non-contact monitoring of all kind of tool geometries

Absolutely reliable – patented NT-Electronics and intelligent Blum protection system
