EZ Breaker Chain Breaker®

 EZ BREAKER is a compact, easy to use tool for cutting roller chain. This simple, rugged piece of equipment will stand up to the abuses of the shop, farm, or industrial environment.

Cut your chain breaking jobs down to size

EZ BREAKER will cut ANSI roller chain sizes 35 through 100H, 40-2 through 80-2, 2040 through 2060H, and 550 through 557 with a simple pull of the handle. No more grinding off pin heads! No more hammers and punches! No more ruined chain!

EZ BREAKER uses powerful cam-action to push both chain pins through the link plates with an easy pull of the handle. Breaking different chain sizes is EZ!

Precision Die Sets for each chain size are easily interchangeable. Changing from one Die Set to another can be accomplished in a few seconds!

The time consuming, tedious job of breaking chain is now accomplished with a single pull of the handle. EZ BREAKER links price and Value!

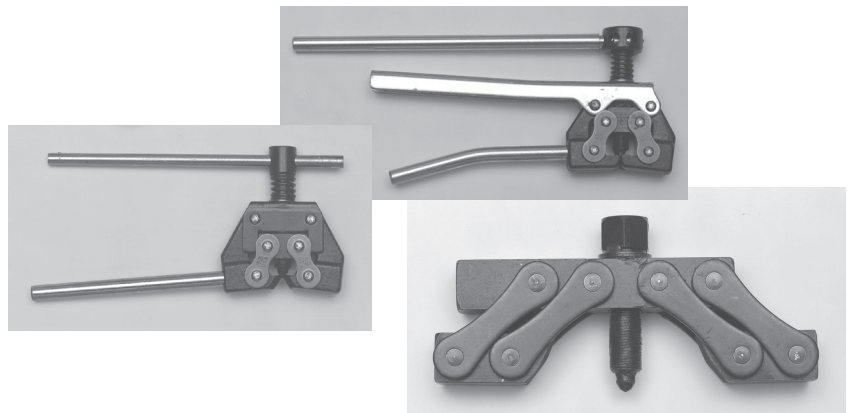

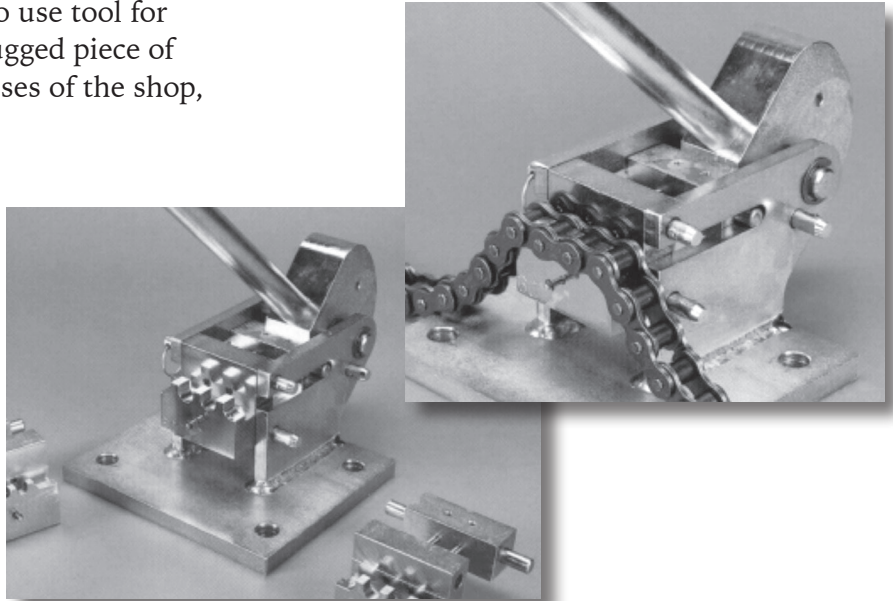

EZ BREAKER has interchangeable Die Sets that make it EZ to switch from one size chain to another!

Available Chain Tools

Hand Breakers/Accessories

Chain Pullers

Replacement tips and screw assemblies available.

Made in U.S.A.

EZ Chain Rack®

Using the EZ CHAIN RACK® is simple. Learn how, in three EZ steps, you can make it EZ to store and cut Drives brand precision roller chain. The EZ CHAIN RACK® is designed to be versatile, allowing four positions to hold fifty-foot reels of chain. It is as easy as 1-2-3.

FEATURES

Construction

- High quality welded construction
- Stand alone base
- 31" x 31" x 51" (rough dimensions)

Center Shafts

- Individually clutched to prevent chain from uncoiling
- Four stations
- Will hold two fifty-foot reels of #40 or #50 chain per station
- OR holds one fifty-foot reel of #60, #60H or #80 chain per station

Gear Box

- Allows EZ-Switch from size to size
- Rotates in both directions

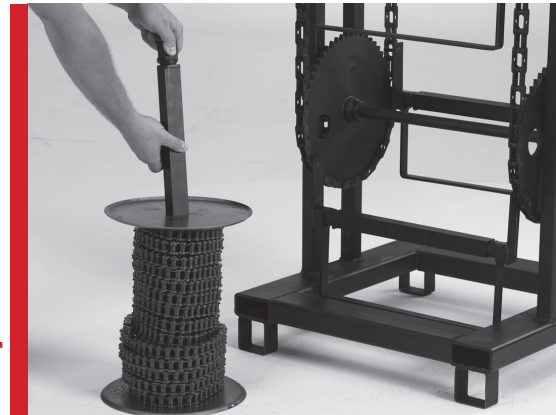

EZ as 1-2-3

Always use proper safety equipment when breaking chain.

* U.S. Patent Number 7,866,592

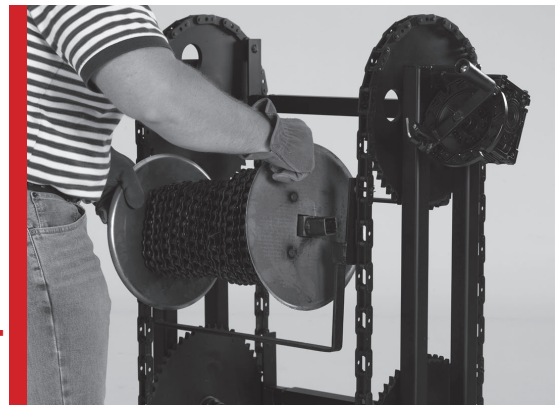

Three **EZ** Steps

Step 1

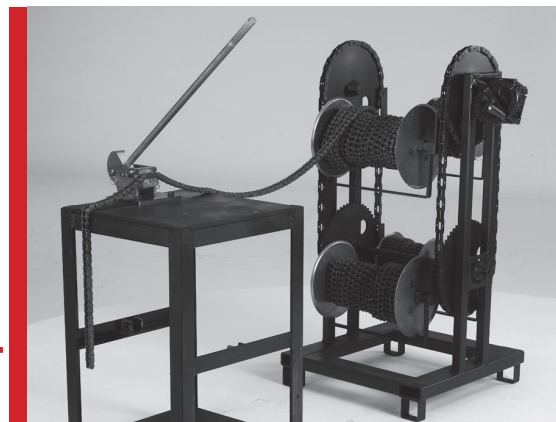

Insert square clutched shaft in roller chain spool.

Step 2

Set clutch assembly and spool into rack.

Step 3

Dispense USA roller chain and cut with EZ Breaker.

Made in U.S.A.

EZ Chain Wear Gauge®

The EZ Chain Wear Gauge® accurately checks up to 9 sizes of American Standard roller chains and up to 7 sizes of Premium British Standard roller chains. Quick and easy to use, go or no-go gauge system gives immediate feedback. The EZ Chain Wear Gauge® will fit into limited spaces and quickly lets the user know if the chain is worn out.

FEATURES

Construction

- Precision ground, pre-hardened tool steel
- Convenient grip handle with pre-drilled holes for hanging, to keep you organized

Part Numbers

Available in three chain gauge sizes:

- #35 chain - #100 chain = Part #60637
- #06B chain - #24B chain = Part #61904
(Actual gauge dimensions: 8.75" L x 0.625" W x 0.188" H)
- #80 chain - #240 chain = Part #60638
(Actual gauge dimensions: 18" L x 1.5" W x 0.250" H)

Note: Gauge should be in line, directly below any outside link plate.

CAUTION: Follow all standard safety measures while using the EZ Chain Wear Gauge. (i.e. - Lock-out/Tag-out, Power Off)

U.S. Patent Number D598, 307 and 7,654,149 and D596,512

EZ Chain Wear Gauge®

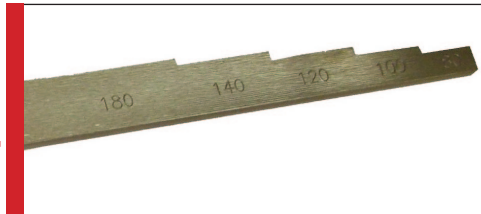

Check the life of your chain

Step 1

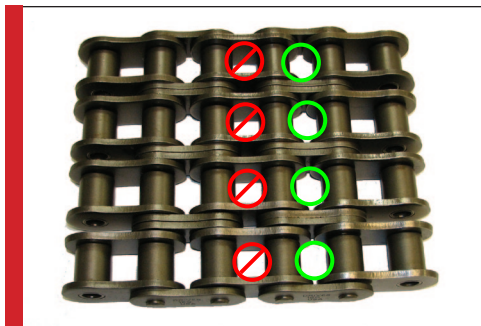

Identify chain pitch size.

Step 2

Locate the corresponding step on the gauge.

Step 3

Check gauge for fit between any two roller links. (Perform with chain in tension.)

Step 4

If the gauge step fits through the check-point, the chain is worn out and needs to be replaced.
