

Product information

Feeding system with Festo Checkbox Compact

For gibs, fasteners, sleeves, screws, standard parts and their uses

- **New member of the Festo Checkbox family**
- **Teach-In-Function**
- **Systemconception of RNA**

As a new member of the Festo Checkbox Family the Checkbox Compact provides the sensor and the analysis in a compact, integrated check unit.

At the same time to the launch of the new Checkbox Compact RNA supplies also the essential components. You get a check modul which is directly integrated in your feeding system.

- ✓ Compatibility to the known Festo Checkbox family
- ✓ Diameter of the work pieces 0,5 – 25 mm
- ✓ Teach-In-Function
- ✓ Mini-conveyor from RNA
- ✓ Control box from RNA
- ✓ Competitive check modul in combination with the approved RNA standardprogramm in one hand.

The compatibility to the known Checkbox-versions means, that the comfortable **Teach-In-Function** is available and also the same analyse software for **Checkup of the poition, Identification of wrong parts** and **Checkup of characteristics** is available.
