

D-53M2

As the production of D-53M is discontinued, the successor model will be D-53M2 from your forthcoming order.

The tension system of D-53M2 is Torque Tension.

The main difference of D-53M2 and D-53M is as follows.

- 1) Adjustable Table Height
D-53M : 3 Steps (732, 642, and 552mm)
D-53M2 : 2 Steps (732 and 642mm)
- 2) Machine Weight
D-53M : 90kg
D-53M2 : 75kg

Improvement :

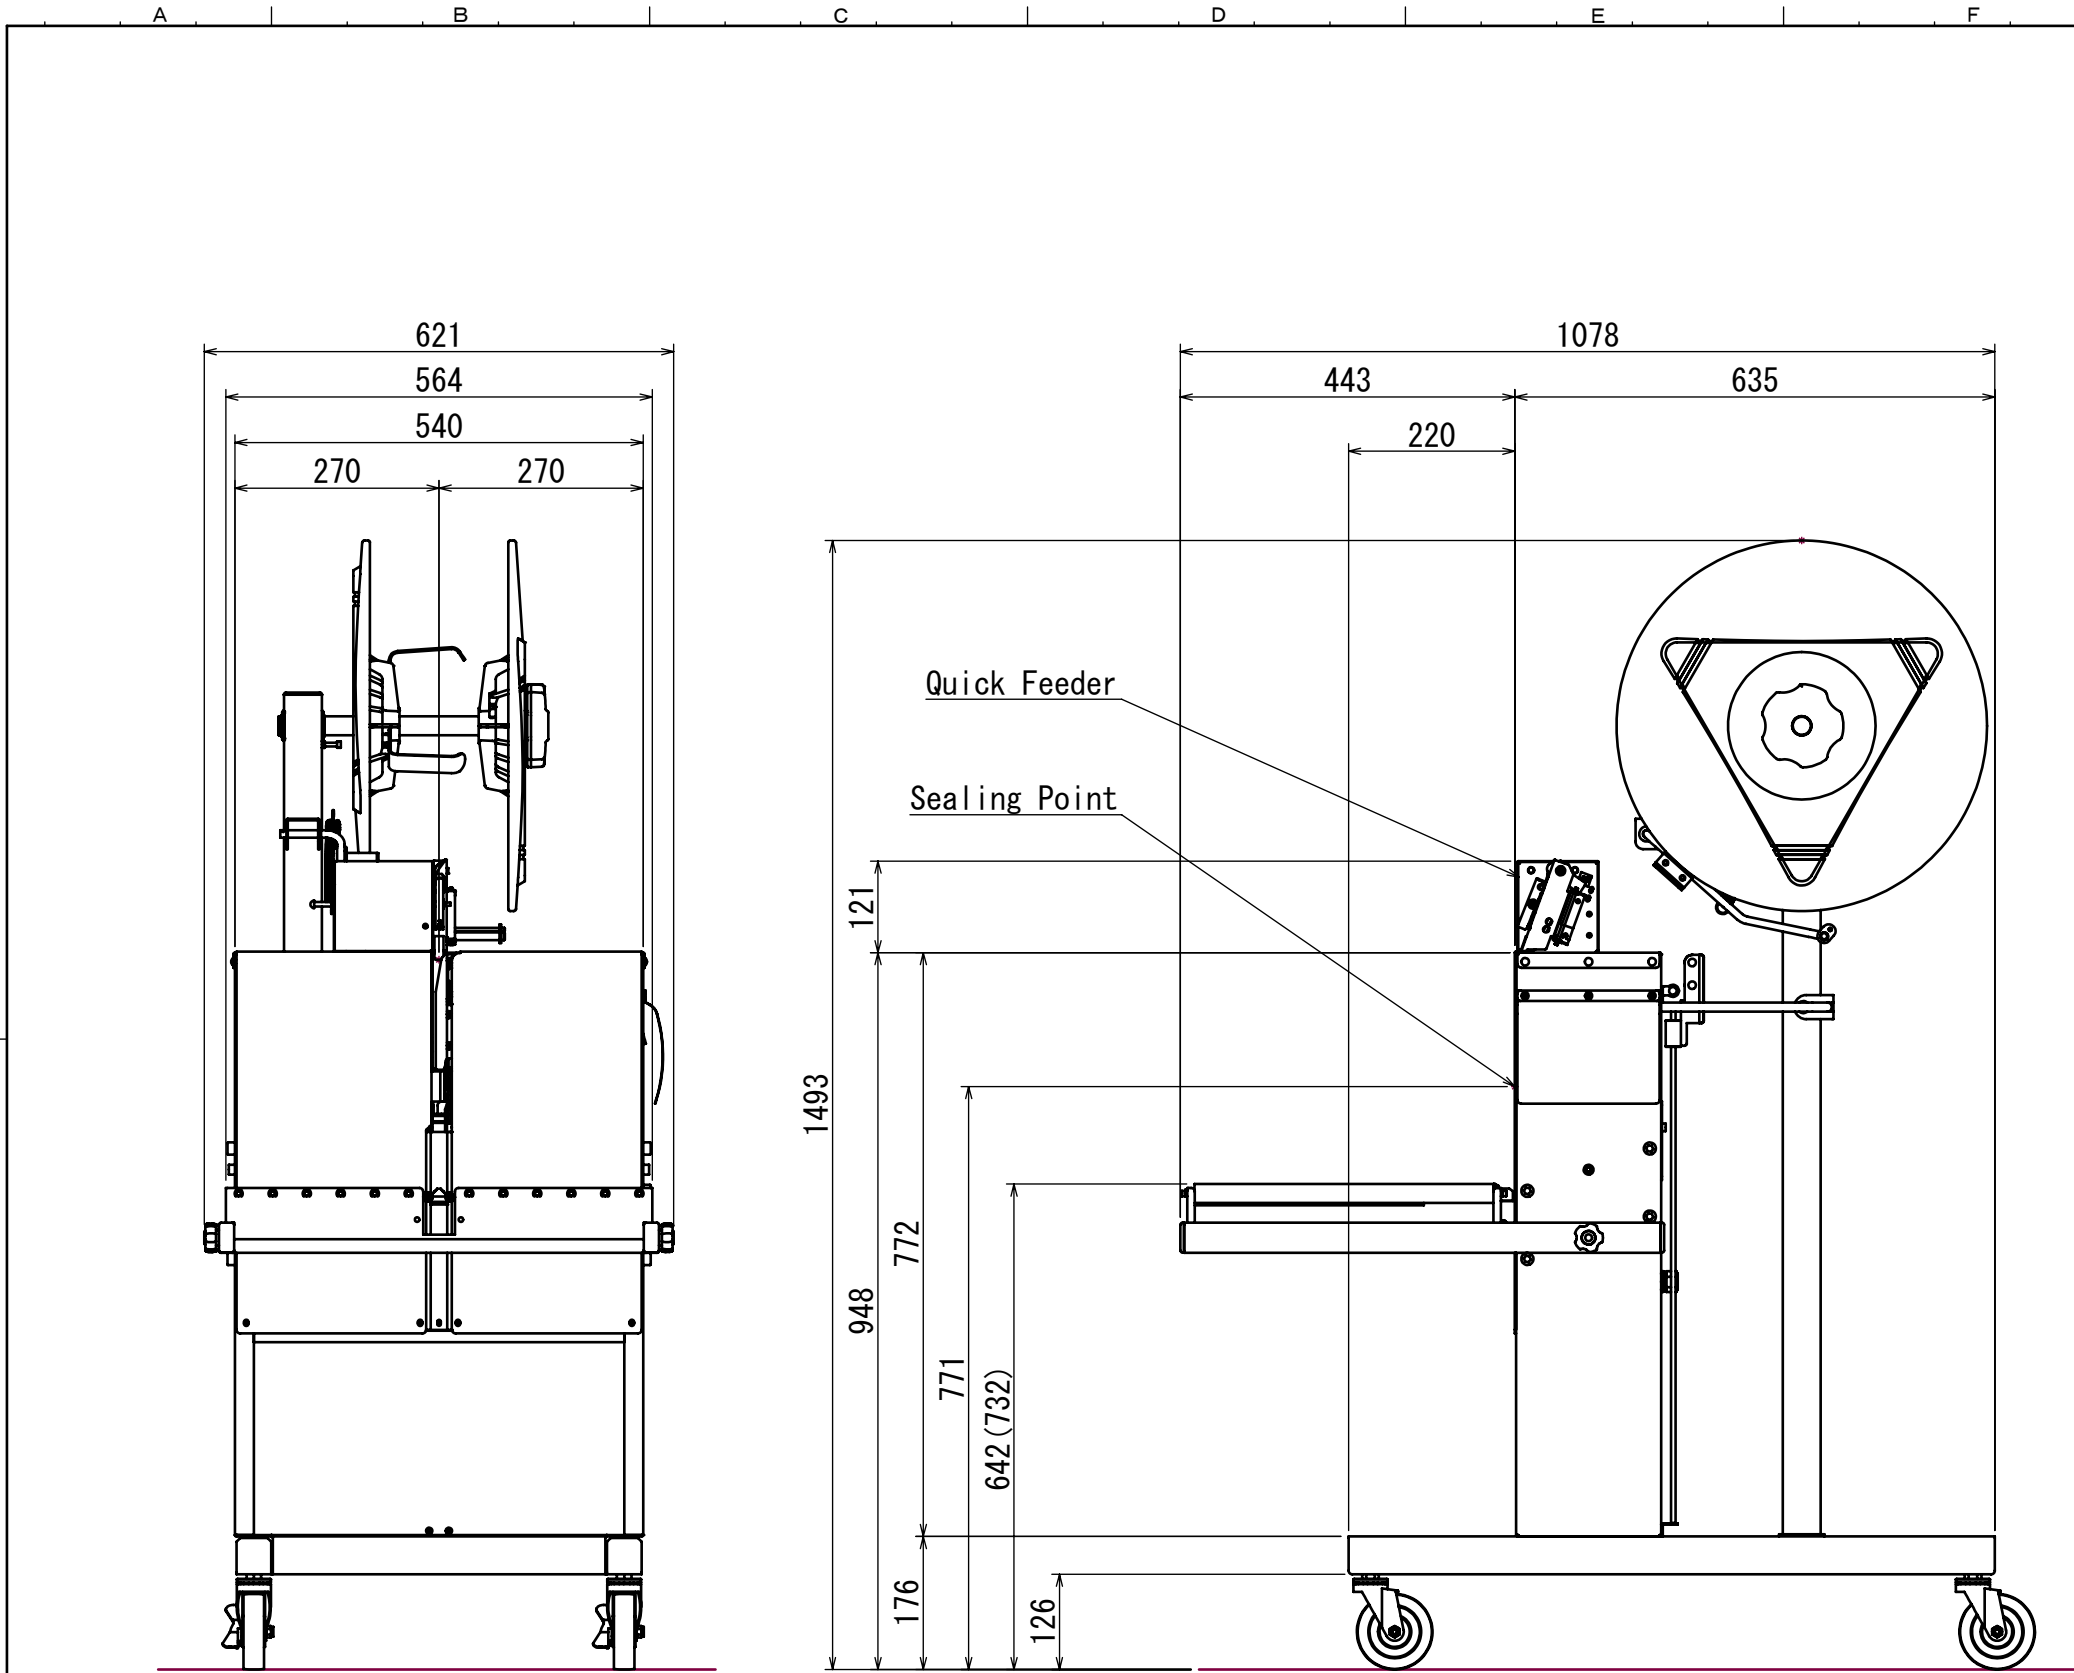

The Press Blocks of D-53M is the Cylindrical shape whereas the Press Block of D-53M2 is Square shapes.

Thus the block goes up straight without turning, i.e., the sharpness of Cutter does not ruined.

Concerning the Parts of D-53M and D-53M2, there is no interchangeability. Further, there is the difference on Block structure as explained the above.
