

AUTOMATIC STRAPPING MACHINE

RQ-8

RQ-8

High-Performance Automatic Strapping Machine

CE

▪ Amazing Strapping Speed

1.5 seconds per strapping cycle -That's 40 straps per minute!

▪ Self-Correcting Technology

Unique self-correcting mechanisms are built into the RQ-8 operation. If the RQ-8 is operated accidentally without a package on the table, the strap will form a small loop which will be automatically ejected from the sealing unit leaving the machine ready for the next cycle.

▪ Easy Strap Loading

Newly developed loading system free of complicated devices makes strap threading almost completely automatic -it's just a touch of a lever.

▪ Permanently Lubricated Mechanisms

Strapack's self-lubricating design has an unsurpassed reputation for its durability and maintenance-free operation.

▪ Quick Heater

Ready to operate in less than 25 seconds. Designed to insure high seal joint.

▪ Self-diagnostic

A programmable microprocessor constantly monitors critical functions. Any irregularity sensed is immediately displayed.

▪ Portable

Heavy-duty metal casters allow for the machine to be quickly installed or moved to any Single Phase power supply outlet.

▪ Variable Tension

A wide range of tension is available to the operator by use of a single tension dial. Tension capability up to 80kg (equivalent to 150mm stroke).

▪ Dependable

Strapack's advanced bandway design assures perfect strap placement and eliminates any twisted straps.
