

Flexibility

We respond and adapt quickly to your product supply needs, both in terms of time and volume.

Quality

All our production processes are fully certified and supervised under strict quality controls.

Personalised Attention

We will address you directly, without delays in communication, contracting and achievement of commitments.

Respect

We are part of and committed to our society, and therefore we strictly comply with environmental and labour legislation.

Good Price

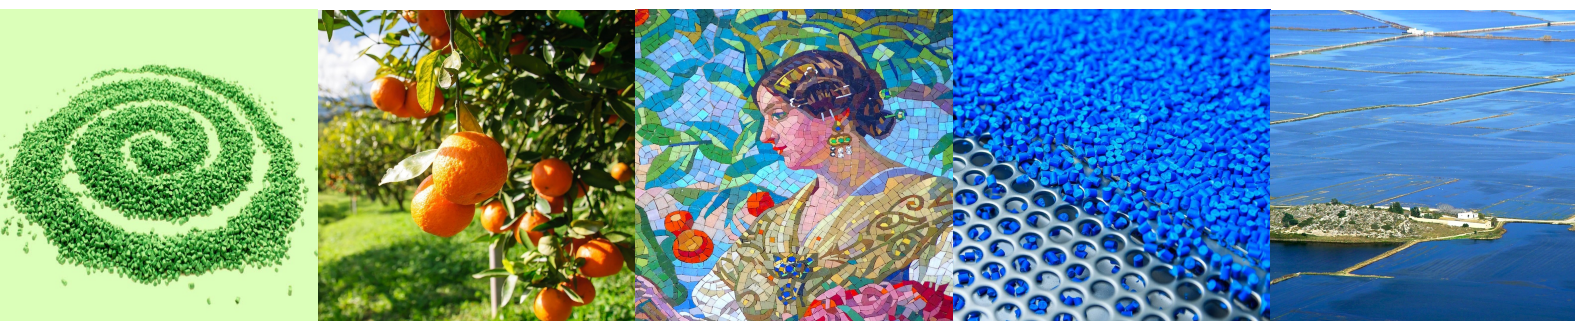

We offer you a guaranteed high-quality product and an attentive and decisive service, all for a fair market price.

Consultancy

We have our own laboratory and an expert human team to advise you and offer you specific solutions for your means of production.

More due to conviction than to legislation: proud to care for our environment

We formulate and produce your PVC compounds

Granzplast: serving the international market since 1989.

At Granzplast we formulate and produce your PVC compounds

If you manufacture rigid or flexible PVC products, by extrusion or injection, at Granzplast we will be happy to meet you. We formulate and make compounds for both processes and we'd like to bring you part of the 25,000 tonnes that we produce annually for national and international companies like yours. You can count on us: we have all the experience, technology and capacity necessary to offer you products, advice and services adapted to your needs.

We are a 2nd generation family business dedicated to providing excellent customer service, with two production plants located in Valencia (Corbera & Sueca) in Spain, making us one of Europe's main PVC compounds manufacturers while working with all the respect and full compliance with the European environmental and labour regulations.

We formulate and produce PVC compounds for multiple markets:

Vinyl floors, profiles for windows and blinds, curtains and partitions, plumbing elements, pipes, gutters.

Masks, non-toxic tubes, cannulas.

Wellies, sandals, boot soles, shoes and slippers.

Weatherstripping for seats, seatbelt guards, encapsulation of glazing, pedals, handles, grips.

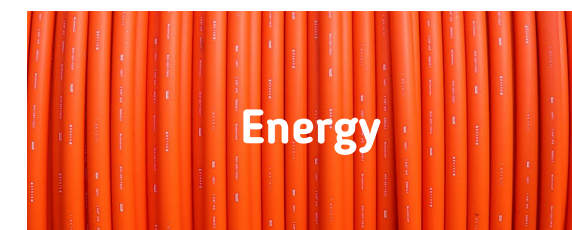

Rigid injected products for plumbing, electricity, automotive components...

Flexible injected products for footwear, signs and beacons, pedals and handles...

Profiles for cabinets, shelves and office tables.

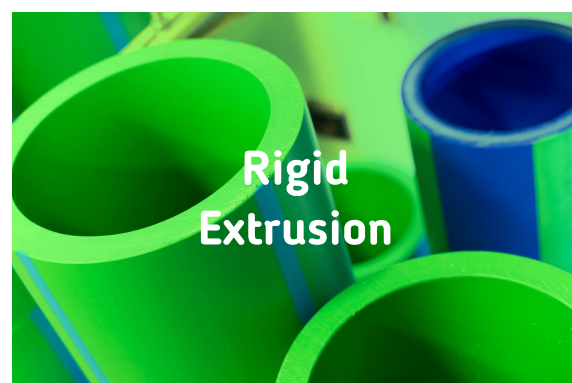

Electrical, computer, domestic cables.

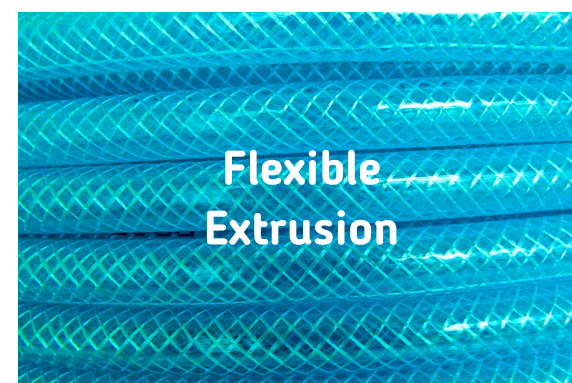

Garden hoses and fences, specialised pipes for swimming pools, profiles for swimming pool covers.

Fibre optic, telephone, special cables.

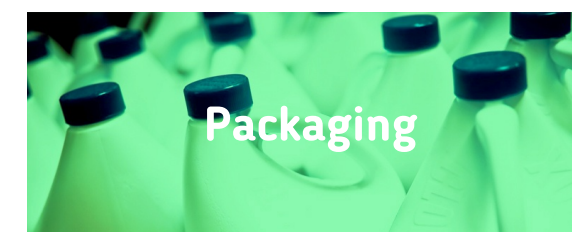

Rigid extruded products such as tubes, frames and profiles for windows...

Flexible extruded products such as cables, glazing rubbers, film...

Traffic cones, beacons and bollards, kilometre points.

Film, bottles and cans for cosmetic, cleaning and food liquids.
