

**THE FIRST RELIABLE
RT-PCR KIT IN THE MARKET**

COVID-19

REAL TIME MULTIPLEX RT-PCR KIT

-  Simultaneous detection of 3 specific COVID-19 genes ORF1ab, N & E besides internal control
-  Low virus load detection: < 5 copies/μl
-  Extracted RNA samples from entire respiratory tract can be used
-  Compatible with multiple RT-PCR Instruments

Highly Specific

- No detectable cross reactivity with most human Coronavirus strains, respiratory pathogens, etc

Utmost Sensitivity

- Wider range of Covid-19 strains covered to detect most mutations (mutation variants)
- Tested and certified raw material with an optimal assay design to achieve low detection levels

Timesaving Approach

- Processing time is approximately 1 hour

Certified Quality

- CE IVD marked reliable quality from Northern Europe

Additional Information

- Compatible RT-PCR Instruments: Most common RT-PCR instruments can be used such as ABI Prism 7500/7900 from Life Technologies; CFX96 from Bio-Rad; Rotor-Gene 6000 from Qiagen
- RNA Isolation: RT-PCR is compatible with several common RNA isolation kits
- Specific RNA isolation kits can also be ordered from LabSystems Diagnostics
- Shelf life: 12 months

Kit Content

Ready to use reagent:

- Covid-19 Reaction mix
- Covid-19 Primer Probe Mix
- Covid-19 Positive control
- Covid-19 Negative control

Availability

- Immediate in kit sizes of 50 and 100 tests with a great value proposition
