

HEATED TANKS

SECTORS OF COMPETENCE

Furniture panels gluing

Heating and mixing of glue for furniture panels gluing

Paints, Glues, Resins and Inks applications

Heating of reagents for special dosages of paints, glues, resins, inks

Resins applications

Heating and mixing for dripping of hot resin on the production of transforms

Serigraphy

Temperature preservation and homogenisation of inks and reagents in the serigraphy processes

Liquid plastic

Temperature preservation and homogenisation of liquid plastic applications

Solvents

Temperature preservation and homogenisation of solvents mixed with reagents

Chocolate production

Heating and mixing of chocolate for cakes and chocolate based food production

Honey production

Heating and mixing of honey for cakes and honey based food production

Tomato sauce

Heating and mixing of tomato for snacks and precooked food production

Wax

Heating, temperature preservation and homogenisation of waxes

Plastic bags

Heating and mixing of base product for blowing of plastic bags

Candies papers

Mixing of flour dough and glue for the manufacturing of base paper for candies
