TO8 24/11/2024

November

Feedingstuffs. Effects of the use of by-products in feed.

Nutrition. Advances in precision feeding of fattening pigs.

Welfare and health. Heat stress in transport and solutions

Precision livestock farming. Animal research and digitisation: developments in Spain and future perspectives.

Management and emissions. Feed efficiency in pigs

Reproduction. Maternity management and disease prevention in piglets.

Genetics. In search of the pig of the future and its tools: artificial insemination.
